## Healthy Eating in a Hurry

Barbara L. Ames

Wildcat District Extension Family and Consumer Sciences Agent

**With back-to-school time upon us, families may be looking at a more hurried lifestyle.** Whether kids are going back into the physical classroom or being schooled at home, there may well be less time to prepare those home-cooked meals that benefit both our health and our pocketbook.

If this dilemma sounds all too familiar to you, be encouraged. There are some things we can do to maximize the food prep time we have available and still accomplish our healthy eating goals even when time is in short supply! Consider these tips:

### **Save Time By Planning Ahead.**

**\*Make a List.** Set aside time each week to plan a menu. Write down what you plan to eat and what ingredients you need for each meal for the week ahead.

**\*Shop Smart.** Save time by grocery shopping only one time each week. Avoid lines by shopping during slower hours at the grocery store such as early mornings or late nights. Stay clear of weekday evenings around dinner time and weekend afternoons when stores are busiest.

### **Consider Convenience.**

**\*Save time by purchasing ready-to-eat produce** such as baby carrots, pre-washed salad mixes, pre-cut broccoli and cauliflower florets, shredded carrots or cabbage, baby spinach, cherry or grape tomatoes, and frozen or canned fruits and vegetables.

### **Try Healthy Time-Saving Proteins and Grains.**

**\*Rotisserie chicken, pre-cooked chicken or beef strips, frozen turkey meatballs, frozen shrimp or individually packaged un-breaded fish fillets** can all be great time-savers.

**\*Try canned low-sodium beans, canned tuna (in water), par-boiled brown rice or microwavable rice packets.**

**\*Experiment with bulgur, whole wheat couscous; or frozen pre-cooked rice, grains, or steel cut oats.**

### **Spend Less Time Cooking.**

**\*Cook in large batches and freeze for later.** It saves time and money to cook a recipe once and eat it multiple times. Soups, stews, casseroles, enchiladas, and lasagna are excellent options.

**\*Use leftovers in creative ways.** When you have food leftover from one meal, reinvent it into something new. Some ideas include:

- Leftover chicken or turkey can be used in soup, quesadillas, or chicken pot pie.
- Leftover steak can make fajitas, beef stroganoff, stew, or Cobb salad.
- Leftover veggies are great in an omelet or quiche, stir-fry, or burritos.
- Leftover fruit is perfect for smoothies.

**\*Seek out “One Pot” meals.** “One pot” or skillet dishes save on both preparation and clean up time by preparing the entire meal in one dish. They are easy to make and usually freeze and reheat well. Search online for recipe inspiration and ideas.

### **Use Time-Saving Small Kitchen Appliances.**

**\*A slow cooker** is a great way to have a meal waiting for you when you get home from work or school. Use a slow cooker to make soups, stews, baked pasta dishes, roasts, or even oatmeal.

**\*A food processor** makes preparing vegetables for cooking quick and easy.

**\*The microwave** makes it quicker and easier to cook foods than in the oven or stovetop. In addition to reheating leftovers, use the microwave to: make scrambled eggs, quickly bake potatoes or sweet potatoes, or steam vegetables.

**A hurried lifestyle doesn’t have to rob you of the great home-cooked meals you and your family need to stay healthy and save money.** Try some of these tips to help your family dine healthfully even when you are crunched for time!
